

Master of Science in Technology Management

Become a leader in a growing professional field

In today's modern world, technology drives almost everything we do. Now, more than ever, we need qualified professionals to help manage and create the technology that keeps our world running smoothly and safely. At UB, we'll help you gain the skills you need to join this rapidly growing industry. By earning your masters in Technology Management at UB, you'll be a part of driving your community into the future through advancements in technology.

Grow your skills with expert guidance

At UB, our Technology Management master's program is designed to advance your expertise while developing your leadership skills — providing you with the knowledge and abilities necessary to manage new technology and increase the efficiency of your organization. With the instruction of our expert faculty, you'll learn strategies and skills for creating and maintaining a competitive edge over rival companies — helping you become a professional asset to any organization.

Choose a path that fits your professional goals

UB's Technology Management program offers eight interdisciplinary concentrations that will help you tailor your education to meet your career goals. Concentrations include:

- Global Program and Project Management
- Manufacturing Management
- Supply Chain, Logistics, and Service Management
- Quality Control and Continuous Improvement
- Biotechnology Management
- Information Technology and Big Data
- Information and Cyber Security Management
- Innovation in Technology Management and Engineering
